

Corporate Press Release

CARBON FIBER 10 YEAR ANNIVERSARY

3500 HOUR / 5 YEAR WARRANTY

For immediate Release

#FULLTBO

June 17, 2021

July 28 - 30, 2021 New Orleans, Louisiana. It has been 10 years since AvidAir introduced its carbon fiber composite lined compressor cases to the market. AvidAir International has successfully delivered over 2500 of these Patented (Patent Number 9,482,114 B2) cases to the industry and continues to document 3500-hour time in service AvidAir / Carbon Fiber Customer units.

The Operator-focused product has proven itself to eliminate premature removal of the Case by reducing the crack propagation and missing plastic typically found with the inferior, outdated plastic lining at inspection periods. AvidAir has reduced operating costs and aircraft downtime with this #FULLTBO product.

Visit www.avidair.com today for complete warranty terms, conditions and patent information.

Visit us at APSCON (Booth #636) to meet with AvidAir Customer Support and view #FULLTBO samples.

For additional information regarding AvidAir International and any of its product details or services, please contact Craig Rookstool, Director of Sales, at 816-246-4527 or craig@avidair.com.
