S.A.F.E Expands Product Line to Include ECO CAF Fire Suppression Equipment

S.A.F.E. Structure Designs is pleased to offer a complete product line of ECO CAF Fire Suppression Equipment for Helicopter operations support and various other applications. Fire Suppression equipment is a critical component of any maintenance facility. ECO CAF equipment is available from S.A.F.E. in portable 3 gallon units all the way up to 60 gallon platform based systems. These units are constructed of steel with steel and brass fittings providing the ultimate in quality and functionality.

S.A.F.E is providing the ECO CAF fire suppression line to US Department of Defense (DOD) agencies and corporate customers. These efficient and economical products provide support to any facility that needs to consider installing or replacing their fire equipment.

“S.A.F.E. Is the leader in providing the most effective and efficient maintenance support equipment for aviation safety.” said Johnny Buscema, S.A.F.E. CEO. “It only fits that we would expand our SAFE products to include fire suppression. ECO CAF products provide outstanding quality and reliability and are a perfect match for our line of custom maintenance stands and fall protection. It is the whole SAFE package.”

S.A.F.E. Structure Designs is the global leader in maintenance support equipment that strives to put safety first. S.A.F.E. listens to the needs of the maintenance teams and designs custom equipment to the exact specifications that consider realistic ergonomic factors as well as efficiency. S.A.F.E provides the answers to the unique challenges of working on complex aircraft.
