

Priority 1 Air Rescue Delivers Flood / Swift-Water Hoist Rescue Training for United States Coast Guard

Priority 1 Air Rescue (P1AR), a world leader in helicopter Search and Rescue (SAR) mission operational support and training, is pleased to announce that it has completed a live flight training course with the United States Coast Guard (USCG) Aviation Training Center (ATC) located in Mobile, Alabama. P1AR provided advanced instructor-led training in specialized helicopter flood / swift-water rescue and hoisting emergency procedures to USCG standardization team instructor pilots, flight mechanics, and aviation survival technician rescue swimmers.

The USCG has awarded P1AR a multi-year contract to provide initial Helicopter Hoist Operator training to new flight mechanics utilizing P1AR's state of the art Advanced Aircrew Mission Simulator (AAMS) and hoist procedure training device located at the Search and Rescue Tactical Training Academy (SART/TAC) located in Mesa Arizona.

"It is a tremendous honor and privilege to have the opportunity to work together with the United States Coast Guard and both the MH60 and MH65 SAR helicopter communities," said Brad Matheson, President of Priority 1 Air Rescue. "We are very committed to continuing our USCG support with our proven live flight training and innovative synthetic SAR training solutions to enhance and support one of the premier SAR agencies on the planet. We truly couldn't have worked with a better group of professionals to make this course such a success."

About Priority 1 Air Rescue –

Priority 1 Air Rescue (P1AR), commonly referred to as the "One Stop SAR Shop," is a small business entity solely focused on Helicopter Search and Rescue and Tactical Mission Training and Operations. With over 20 years of experience, P1AR has provided industry-leading SAR and Tactical training to over 9,000 students worldwide. In addition to its full-time training and support staff, Priority 1 Air Rescue provides full-time Hoist system Operators, Helicopter Rescue Swimmers, and Paramedics for SAR/ Medevac programs providing 24/7, 365 days coverage on commercial SAR contracts around the world.

The P1AR Search and Rescue Tactical Training Academy (SART/TAC) facilities are located in Mesa, Arizona, US and Bordeaux, France. SAR/TAC employs the latest Advanced Aircrew Mission Simulator (AAMS) SAR and Aerial Gunnery Synthetic Training Devices with hoists, cockpits, NVG, M134, M240, GAU21 weapon platforms, an AUF helicopter sniper dome, and Hoist Procedural Towers, Fast-Rope and Rappel Tower, Multi-media Classrooms, and EASA, FAA, TC compliant training programs for Helicopter Hoist Operations (HHO) and Human External Cargo (HEC).
