

Challenger Aerospace Systems Acquires AeroComputers, Inc., Press Release 06 March 2020

Challenger Aerospace Systems is pleased to announce the acquisition of AeroComputers, Inc. Under the new name AeroComputers, Corp. a dedicated team of professionals will continue operations at the Oxnard, California location. The excellent products, customer service, and support for law enforcement agencies will continue with enhanced innovative solutions planned for Public Safety Aviation.

“We are excited to become a part of the Challenger Aerospace family of business and look forward to the positive changes this collaboration brings to our augmented reality products.” said David Cady, Director of Global Sales.

About AeroComputers, Corp.

AeroComputers, based in Oxnard, California, has been designing, building and marketing computer systems that manage tactical operations for public aircraft since 1993. With over 750 systems currently employed by over 250 law enforcement, fire, government and public safety agencies worldwide, AeroComputers is the industry leader in providing mission management systems that integrate high-precision live video overlay (augmented reality), GPS-based moving maps, EO/IR sensor command, video processing, and mission telemetry collection and transmission. AeroComputers’ complete suite of products includes mission management systems, real-time map/gimbal video integration, a range of ruggedized keyboards, and customized GIS and cartography services.
