EuroSafety Announces H125 Airframe Course During Heli-Expo 2023

January 11, 2023 - Las Vegas, NV

Professional flight and ground training experts, EuroSafety International (ESI) have announced they will offer an H125 airframe ground school presentation during the upcoming Helicopter Association International (HAI) Heli-Expo at the Atlanta Convention Center during the event in March 2023.

The course will be conducted on Monday, March 6, 2023 from 0800 to 1700 hours prior to the opening of the exhibits for the HAI Heli-Expo on Tuesday, March 7, 2023. Attendees of the class will have the option to schedule reduced-price flight training once the ground portion is completed. ESI can provide training at their Burbank, California location in either the AS350 or EC130 model type airframe or in customer owned airframes.

The ability to recall information diminishes over time and this course is designed to refresh and reinforce the academics of the H125 model type airframe. The ESI recurrent class is not only ideal for pilots who are new to the aircraft but particularly beneficial to the pilots that require annual refresher training.

EuroSafety International ground schools utilize sophisticated proprietary computer graphics and three-dimensional animations to analyze aircraft systems and performance as well as discussing normal and emergency procedures. Additional considerations for the safe and efficient operation of the airframe will also be presented during the course of instruction.

Preferred pricing is available if registration is completed prior to January 29, 2023.

Price if registered prior to January 29: \$555 HAI Member | \$825 Nonmember

Price if registered after January 29: \$710 HAI Member | \$1,040 Nonmember
