CNC Technologies Awarded Washington DNR's Kodiak Mission Suite Upgrade Contract

LOS ANGELES (March 9, 2023) – CNC Technologies, an aviation technology and wireless communications company serving National, State and Local Law Enforcement, Fire Departments and Utility Agencies, was awarded by Washington Department of Natural Resources a comprehensive, multiyear contract to upgrade the State's Kodiak aircraft and develop a real-time high definition and actionable data transmission network for its many missions including firefighting.

CNC Technologies' history of developing state of the art airborne mission suite solutions was the driving force behind the award. The combination of CNC's extensive relationships with FLIR Teledyne, Troll Systems and Shotover Systems along with unmatched 24/7/365 service, made CNC the clear choice for WA DNR. The results of this collaboration will provide actionable intelligence to any internet connected device, such as mobile phones, laptops, smart devices, command centers.

As the prime contractor, CNC will be responsible for providing mission suite design, delivering all equipment, overseeing aircraft integration, and will provide 24/7/365 service and support along with ongoing technical and operational training. CNC Technologies continues to grow its customer base in the western US, having recently secured projects with California Highway Patrol, Inglewood Police Department, Los Angeles Sheriff Department, Orange County Sheriff Department, Ontario Police Department, East Bay Park Police in addition to Washington DNR.

"CNC Technologies offered a comprehensive solution interoperable with our law enforcement and fire department's aerial and ground assets. CNC's reputation and unwavering service to its clients were a driving force behind our decision" explained Rich Knoth, Chief Pilot, WA DNR.

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators. CNC works with clients around the globe, delivering customized mission suite solutions tailored to match each organization's specific mission requirements and backed by unparalleled 24/7 service and support.
