

Baldwin Unveils Updated Interface and New Mobile App to Streamline Safety Management

October 17, 2024 – San Francisco, CA – Baldwin Safety & Compliance, a Portside company and a leader in aviation safety management solutions, is proud to announce the launch of a new, user-friendly interface, including an optimized navigation menu this month and a mobile app in early 2025. These enhancements streamline access to critical safety management functions, ensuring a more intuitive experience for clients.

The reimagined, streamlined interface introduces a clean, modern design that enables aviation safety managers and frontline individuals easy access to crucial functionality. “The release of this new look and feel is another way our new development team is working to make rapid updates to our software,” said Dr. Jason Starke, VP of Safety & Standards at Baldwin. “Our clients who have had early access to the new interface are impressed by the significant improvements it brings to the Baldwin platform.”

In addition to the interface upgrades, Baldwin is launching a new native iOS mobile app tailored for preflight risk assessment and safety reporting. This app brings safety management capabilities directly to the fingertips of pilots, safety officers, and technicians. An easy-to-view schedule of flights is the launching point to enable users to conduct risk assessments, document safety concerns, and submit reports seamlessly from their mobile devices, with or without an active internet connection.

"We are committed to providing our clients with easy-to-use solutions that enhance their safety management capabilities," said Dr. Starke. "Our upgraded portal interface and new mobile app are designed to make safety management easier to access and more streamlined for the fast-paced demands of today's aviation industry."
