COURSE DESCRIPTION:

The AS350 Recurrent/Differences Ground School is a technical review of the aircraft, and will include an in depth overview of aircraft systems, limitations, and emergency procedures. The discussion will encompass various versions of the AS350 to include the B2, B3, and H125 (B3e). The instructor will utilize specific aircraft limitations or emergency procedures to guide a path of discovery to understand "why" procedures have been developed and how the best course of action, recommended by the manufacturer, is utilized. This course is suitable for pilots and instructors having previous experience in the AS350 helicopter. An AS350 Recurrent/Differences Ground School completion certificate will be issued to those having previously completed an Initial AS350 course of instruction from a recognized training provider, and attend the scheduled 8-hours of training.

Maximum enrollment: 50
