CNC Technologies Assists Modesto Police Department In Establishing First Aviation Unit.

MODESTO (July 18, 2023) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today that they supported the Modesto Police Department with the establishment of their Aviation Unit.

CNC Technologies sold the Modesto Police Department a fully-equipped GippsAero GA8 airplane that was previously operated by the Pennsylvania Attorney General's Office. CNC took the GippsAero GA8 Airvan as a trade-in while delivering a missionized Cessna Grand Caravan to the State of Pennsylvania.

CNC's guidance included contractual due diligence, assistance with aircraft inspections, and logistical and financial support. This all took place while Modesto's budget, legal and operational teams worked together to close the transaction. The result was a mission-ready aircraft that was put into service almost immediately upon arrival in Modesto, California.

"CNC's ability to quickly adapt to the procurement and operational needs of our law enforcement customers has proven to be very valuable," said Alex Giuffrida, Managing Partner. "Our 'customer first' motto was evident here and resulted in a smooth and problem-free transaction."

CNC Technologies remains committed to supporting law enforcement agencies through cutting-edge aviation technology, seamless solutions, and collaborative partnerships. CNC's successful support of the Modesto Police Department's Aviation Unit underscores their dedication to enhancing public safety and security.

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators.
