**Helicopter – Safety Enhancements**  
Our Vision: A civil helicopter community with zero fatal accidents

### Loss of Control - Inflight (LOC-I), Unintended Flight into IMC (UIMC), Low Altitude Operations (LALT).

USHST continues to work on the implementation of Helicopter - Safety Enhancements (H-SEs) developed through data-driven analysis of 104 fatal accidents. The H-SEs use Outreach, Policy, Technology/Equipment, and Training to reduce fatal accidents in these categories.

### US Helicopter Safety Team New Helicopter Safety Enhancements (H-SEs)

**23-01: Promote conservative go/no-go decision making (includes performance planning)**

-HAI's Safety Working Group released some early "primer" material on the topic that they've socialized through Rotor Daily, and they are working on a formalized work plan for where they'd like to go with it over the next year.

**23-04: Improve fatigue awareness and risk mitigation of scheduling factors leading to fatigue.**

-Pulsar Informatics, Inc is leading this effort with support from AMOA and Delta P. They've developed an initial work plan.
