### **AEM launches new panel-mount Bluetooth® Audio Accessory**

*Kelowna, BC, Canada, October 23, 2023* – Canadian avionics manufacturer, Anodyne Electronics Manufacturing Corp. (AEM), takes its audio offerings to new heights with its brand-new panel-mount Bluetooth® Audio Accessory. The BAA01-001 Bluetooth® Audio Accessory is designed to add Bluetooth® connectivity to existing avionics, audio, PA, or loudspeaker systems.

The BAA01-001 supports discrete phone calls and music audio using the built-in Bluetooth® audio profiles. An integrated front-panel LED annunciator displays the power, pairing, and link status. The unit allows operators to easily adjust control and volume of the Bluetooth® music and call audio playback using the BAA01-001's built-in front-panel rotary encoder.

Designed with operators in mind, the BAA01-001 features two Bluetooth® connections, two front-panel Type-C USB connections for charging, and a rear-pin dedicated USB out – including shared 7-Amp USB current.

“The BAA01-001 helps operators of any kind securely connect their phones, or other Bluetooth® devices, to existing aircraft audio and avionics equipment,” says Tony Weller, AEM's Director of Sales and Marketing. “Our intention with this product is to help integrators improve the experience for operators with such a flexible and easy-to-install unit.”

The [BAA01-001](#) is on the shelf and available to order and ship immediately. Please contact AEM directly for assistance with the BAA01-001 or any of your avionics integration needs.
