

## **NTSB** TRAINING CENTER

The National Transportation Safety Board (NTSB) is pleased to offer its Helicopter Accident Investigation Course on June 15-19, 2015, at the NTSB Training Center in Ashburn, Virginia.

The course will provide participants with a comprehensive overview of the procedures, methods used and the skills required with all aspects of helicopter accident investigation. NTSB Investigators will present examples from recent investigations to demonstrate particular aspects of the investigative process, and Instructors from the US Army National Guard will provide instruction in helicopter aerodynamics, operations and investigations. Finally, representatives from major helicopter manufacturers will present the party member perspective, product overview, and case studies. Attendees will also have the opportunity to practice their investigative skills through a hands-on helicopter wreckage examination and examination of an in-tact UH-1 Iroquois.

For further information and to register for the course, please visit:
