CNC Technologies Delivers New Cessna 208 Caravan to the Texas Department of Public Safety

LOS ANGELES (March 3, 2022) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today the delivery of a new Cessna 208 Caravan aircraft to the Texas Department of Public Safety. As part of the project, CNC has also developed a comprehensive law enforcement mission suite for the new aircraft which will enable air crews to stream real-time HD video and data to ground-based forces around the State of Texas.

Incorporating a Churchill Navigation ARS 700C moving map system and Wescam MX-15HDI gyrostabilized gimbal equipped with HD wide angle, HD zoom and HD infrared payloads, the state-of-the-art mission suite features an advanced microwave downlink system to ensure uninterrupted video, audio and data transmission across all environments. Completion services for the aircraft and installation of the mission suite are being performed by ProStar Aviation of Londonderry, NH. The aircraft acquisition was facilitated through CNC's Aviation division, an authorized supplier of Textron aircraft including Cessna and Beechcraft.

In addition to bringing enhanced capability to the Texas DPS, the new mission suite is fully interoperable with the agency's existing statewide microwave downlink infrastructure. CNC will also provide ongoing training, warranty service and 24/7 support for the new aircraft and mission suite.

"The Texas DPS fields one of the country's largest and most sophisticated airborne divisions with more than 20 aircraft and nearly 100 operators," said Ron Magocsi, founding partner and chief technology officer at CNC Technologies. "We are proud to have been awarded this project and look forward to supporting the agency in its public safety mission."

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators. CNC works with clients around the globe, delivering customized mission suite solutions tailored to match each organization's specific mission requirements and backed by unparalleled 24/7 service and support.
