CNC Technologies Selected by Tennessee Bureau of Investigation for United States first statewide law enforcement airborne transmission network.

TENNESSEE (March 7, 2023) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today a sole source award by the Tennessee Bureau of Investigation. The project will consist of the retrofitting of TBI's Pilatus PC-12 complete with latest generation downlink technology, microwave and cellular. CNC Technologies' system architecture will allow TBI's aircraft and any other Local, State and/or Federal aircraft to transmit data and high definition imagery to ground assets (mobile devices, command centers, etc) via CNC.live from anywhere in the entire state of Tennessee, TBI's bespoke Airborne Law Enforcement Network will result in seamless information sharing with complete interoperability amongst Tennessee's law enforcement agencies.

"We are grateful to be working with TBI, the entire team at TBI is laser focused on deploying this network and we are honored to have been chosen to help them," said Alex Giuffrida, founding partner at CNC Technologies, "CNC.LIVE is the industry's most advanced airborne intelligence solution for centralizing multiple video and data streams and delivering it to the people who need it most, providing actionable, real-time intelligence to officers on the ground."

The solution leverages CNC's deep expertise developing state-of-the-art airborne law enforcement and intelligence systems for local, state and federal agencies and is backed by the company's 24/7/365 Service, Support and Training.

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets.
