CNC Technologies Provides Completion Services for the Dallas Police Department Bell 407GX

DALLAS (July 13, 2023) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today the delivery of a fully equipped Bell 407 to the Dallas Police Department. CNC Technologies has worked with Dallas PD for the last six years, and this is CNC’s third aircraft completion for DPD.

The aircraft was outfitted with a full law enforcement mission suite including a L3/Wescam MX-10 imager, Shotover ARS 750 moving map system, MacroBlue monitors and Trakka TLX searchlight. Integration services were provided by AeroBrigham in Decatur, Texas. Additionally, CNC will provide their signature, 24/7 service and support, training, and access to CNC.Live. The new Dallas PD mission suite is fully interoperable with the agency’s existing fleet and also with neighboring agencies such as Fort Worth PD and Texas DPS. Interoperability is critical for the purpose of coordinated responses to critical incidents, natural disasters and events where multi-jurisdictional responses are required.

“We are excited to continue our long relationship with the Dallas Police Department,” said Alex Giuffrida, founding partner at CNC Technologies. “With the use of CNC.Live, this mission suite makes it easy for Dallas PD to communicate with and work alongside other Texas agencies.”

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world’s most demanding operators. CNC works with clients around the globe, delivering customized mission suite solutions tailored to match each organization’s specific mission requirements and backed by unparalleled 24/7 service and support.
