

PRESS RELEASE

Date: July 13, 2023

Orlando, FL - July 14, 2023 –APSCON 2023

Digital Airware, llc (**APSCON Booth #514**) and Turbolyft Aerospace Corporation (**APSCON Booth #518**) announced today that they have signed a Memorandum of Agreement (MOA) to work together to provide the aviation industry an all-compassing suite of software, parts, aircraft builds and law enforcement aircraft lease program.

Digital Airware, a leader in digital aviation solutions, and Turbolyft Aerospace, a specialized Airbus Helicopters custom aircraft solution provider are thrilled to announce their strategic partnership aimed at revolutionizing the future of air transportation.

The collaboration between Turbolyft Aerospace and Digital Airware brings together two innovative teams in the industry, each with a distinct expertise that will be leveraged to develop custom solutions for today and tomorrow's operators. This partnership marks a significant milestone in the pursuit of safer, more efficient, and unique solutions. The joint efforts will address the pressing challenges faced by the operator today, including supply chain short comings to highly technical custom integration completions.

"Digital Airware's Aerospace Solutions allows customers to view 26 integrated modules of day-to-day operations and functions in one customizable software solution simplifying the management of all aspects of your operation,"

Michael Demoreta, *Digital Airware -Vice President*

"Over the years we have continued to provide the industry with leading software and support to enhance all aspects of aviation operations with our 26 integrated modules. We hear the pulse and demand of the industry and continue that support in moving towards providing a one stop shop solution. The agreement with Turbolyft's impeccable workmanship and support will elevate and help provide that need to the industry.

Joaquin Demoreta, *Digital Airware – President*

"We are excited to partner with Digital Airware on this endeavor. Together, we will look to support current and future Airbus Helicopter operators with unique and innovative solutions from parts dashboard support to full custom completions. This partnership represents a significant step forward in our mission to support operators in a ever changing environment."

Jeremy Prasad, *Turbolyft Aerospace Corporation – President*

MEMORANDUM OF AGREEMENT

Digital Airware's Aerospace Solutions is an all in-one customizable tool, allowing maintenance and operational managers to easily forecast, update, print reports and stay compliant within industry standards. Digital Airware's stop light feature allows users to easily identify new maintenance and service actions and intuitively navigate through the program.

Digital Airware, LLC *based in Charlotte, NC* is a fully integrated Aviation Management Solution Software-as-a-Service provider. It provides web-based aviation solutions to flight operations and their users around the world. Digital Airware provides an intuitive customizable software solution for operators to view live information processing requirements for any size rotary- and fixed-wing aviation operation over the Internet on a subscription basis.
