CNC Technologies Completes Delivery of New Cessna 208 Caravans to California Highway Patrol, Texas Department of Public Safety and Pennsylvania Attorney General's Office

LOS ANGELES (July 27, 2022) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today it has completed delivery of three new Cessna 208 Caravans to the California Highway Patrol (CHP), Texas Department of Public Safety and Pennsylvania Attorney General's Office. CNC acquired the new aircraft on behalf of the agencies through its CNC Aviation division, an authorized supplier of Textron aircraft including Cessna and Beechcraft.

In addition to leading the aircraft acquisitions, CNC also developed comprehensive law enforcement mission suites for each of the new aircraft and will be providing ongoing operator training and support to the agencies. Each customer will be operating a Caravan equipped with an advanced thermal imager, moving map system and a Tactical Flight Officer station with large monitor, keyboard and tactical radios. All of the mission suites were designed for full integration with the agencies' respective communication and downlink systems, enabling seamless connectivity from day one.

Installation and integration of the mission suites was performed by Hangar One Avionics for the CHP aircraft and by ProStar Aviation for the Texas DPS and Pennsylvania AG Office aircraft.

"We have strong existing relationships with each of these three agencies are pleased to have been selected as a partner for the recent aircraft acquisitions," said Ron Magocsi, founding partner and chief technology officer at CNC Technologies. "We look forward to continued work in supporting their public safety missions."

The assignments build upon CNC's growth over the past year and work with a broad range of law enforcement and public safety agencies including the Swedish National Police, Jamaica Defence Force and Massachusetts State Police.

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets.
