

## **AeroBrigham Inks Deal to Represent Serastar Technologies Corporation**

*July 27, 2017 - Decatur, TX*

Aircraft customizing, maintenance and support provider, AeroBrigham has announced the company will provide integration, distribution and support services for a revolutionary and cost-effective means to send encrypted video and audio from aerial platforms anywhere in the world. Serastar Technologies Corporation's Surveillance, Target Acquisition, Recon System (STARS) equipment allows streaming video in a compact ISR video transmission and recording platform using simultaneous Wi-Fi, 3G/4G, MANET Radio and Harris™ tactical transceivers so it is not dependent on having line of sight access. A secure back end server (internet) allows the signal to be distributed to authorized and authenticated users around the globe. The simple operation and very low maintenance system can record up to six hours of video via PVR integrates with Android Tactical Assault Kit (ATAK) and has remote playback and recording with VLC, QuickTime or other compatible player mediums.

With a much lower weight system, the STARS technology also has a significantly lower cost than traditional microwave downlink type real time video feeds from airborne platforms. The system is capable of processing any analog video signal and converting to a digital format to transmit the feed. Examples of input include FLIR and Wescam platforms, Leupold MK IV Spotting Scope with Kaishot Camera as well as analog video feeds.

Based in Decatur, Texas, just north of the Dallas/Ft. Worth area, AeroBrigham offers comprehensive helicopter and airplane maintenance services with complete avionics, paint, interior and support capabilities and a staff with extensive aviation maintenance experience. The company will again be exhibiting at the upcoming ALEA Expo 2017 in Reno, Nevada from 24-29 JUL. The company invites all attendees to register to win a pair of men's custom handcrafted Rios of Mercedes western boots.

Located at the Decatur Municipal Airport (KLUD) in Decatur, Texas, north of the Dallas/Ft. Worth area, AeroBrigham is a FAR Part 145 repair station that offers

complete maintenance, repair and overhaul services as well as inclusive helicopter and airplane completion services including aircraft interiors, avionics installation and modification, paint, heavy maintenance and overhaul capability. Additional information regarding the extensive helicopter and airplane support capabilities at AeroBrigham can be found at [www.aerobrigham.com](http://www.aerobrigham.com) or by calling 940.626.4849.
