

Axnes Announces the New MP30 Wireless Intercom

March 7, 2017 - Dallas, TX

Wireless intercom technology innovator, Axnes has announced the introduction of the new MP30 handheld transceiver as a follow-on to the MP50 unit debuted last year. The MP30 is a smaller, lighter, and lower cost alternative to the MP50 and includes many of the same comprehensive features. These include single band UHF frequencies, full duplex transmission and reception, built-in noise and echo cancelling, along with secure proprietary waveform and protocol technology, all encased in rugged water and dust resistant aircraft grade aluminum housing. Common headset and microphone connections along with a 20G certified charging cradle that integrates into aircraft, marine, or ground vehicles, are standard equipment.

Other robust features include a battery life of up to 15 hours of continuous operation or 40 hours of standby capability and the latest airborne environmental and software standards. A night vision goggle (NVG) compatible screen with both voice activated (VOX) and push to talk (PTT) function allow users to easily integrate the MP30 into multiple critical and routine civil and military mission profiles. Secure voice technology ensures that communications by MP30 handheld users cannot be compromised by others.

Options for the new MP30 include GPS positioning, AES 256 software encryption, and custom headset or helmet connector options available for quantity orders. The new MP30 can be seen during the Axnes press event on Wednesday 8 MARCH 2017 beginning at 2 P.M. on exhibit #7452 during the Helicopter Association International (HAI) Heli-Expo from 7-9 March 2017, in Dallas, Texas, U.S.A.

About Axnes

Axnes Aviation develops and supplies advanced and highly durable wireless intercom solutions for use under harsh conditions on aircraft and other demanding applications. Axnes is well known for its successful wireless ICS solutions and today more than 850 aircraft worldwide are equipped with their wireless technology.

The company has been supplying its wireless intercom systems for almost two decades and is an EASA Part 21 and Part 145 approved organization. Axnes is an approved

supplier to OEMs such as Leonardo, Airbus Helicopters, Bell Helicopter and Sikorsky. Axnes Aviation AS was founded in 1995, and is a 100% privately owned company with its main office located in Grimstad, Norway.
