CNC Technologies Announces Master Contract with the Ohio State Highway Patrol

Los Angeles (July 31, 2024) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military, and government markets, announced today a master contract with the Ohio State Highway Patrol that helicopter and fixed-wing fleet upgrades over the next several years.

As part of this comprehensive agreement, CNC Technologies was awarded a multi-year Third Party Agreement (TPA) that will encompass maintenance and upgrades to the existing fleet of aircraft operated by the Highway Patrol, including the purchase of multiple fixed-wing aircraft to replacing aging Cessna 182's, as well as the replacement of multiple helicopters.

“We are thrilled to announce our multi-year agreement with the Ohio State Highway Patrol,” said Ron Magosci, founding partner at CNC Technologies. “We look forward to continuing our solid relationship with the agency.”

In addition to the future aircraft upgrades, CNC Technologies has recently installed nine microwave downlink receive sites across the State of Ohio. This installation makes Ohio the second state, after Tennessee, to achieve statewide downlink coverage with CNC.
