CNC Technologies to Provide Searchlight Upgrades for the Pasadena Police Department

LOS ANGELES (July 29, 2024) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, was selected by the Pasadena Police Department to upgrade the searchlights on three of their agency helicopters.

The project calls for delivery and installation of the TrakkaBeam TL360. Trakka lights deliver brighter and more consistent illumination while reducing power consumption as compared to older generation systems.

This upgrade will improve visibility, safety and operational efficiency for the police department's aviation unit. CNC's selection was the result of a competitive bid where CNC's value proposition, experience, and its unparalleled service, support and training made CNC the clear choice.

"We are thrilled to continue our relationship with the Pasadena Police Department," said Alex Giuffrida, founding partner at CNC Technologies, "We will work with Rotorcraft Support Inc. (RSI) to complete the integration and certification of these products. RSI's long history in law enforcement aircraft completions and its history with the Pasadena Police Department makes them a great partner in this project."

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators.
