CNC Technologies Announces \$10 Million in New Contracts in Q1 2018 as Company Adds Raft of New Law Enforcement and Public Safety Clients

LAPD, Michigan State Police, Broward County Sheriff, Ohio State Patrol and Atlanta Urban Area Security Initiative (UASI) Among Company's New Contracts

LOS ANGELES (March 7, 2018) – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today exceptional Q1 2018 revenue growth. Results were driven by a surge in new business with the company adding the Los Angeles Police Department, Michigan State Police, Ohio State Patrol, Atlanta Urban Area Security Initiative (UASI), Broward County Sheriff and several other agencies, Systems Integrators and Aircraft OEM to its client roster. Other CNC clients include the New York Police Department, Texas Department of Public Safety and Swedish National Police.

Founded by industry veterans Alex Giuffrida and Ron Magocsi, CNC Technologies provides major operators with a single source solution for the design, development and implementation of large scale aerial surveillance, counterterrorism and transmission systems. The company has broad expertise across a full range of mission profiles, from deploying microwave downlinks and airborne mission suites to implementing nationwide counterterrorism networks encompassing aircraft, ground-based receive sites, imaging platforms and encrypted communications systems.

“We launched CNC Technologies to simplify and strengthen the ability of law enforcement and public safety agencies to operate robust, high-performance aviation technology and transmission systems that help safeguard their communities,” said Ron Magocsi, founding partner and chief technology officer at CNC Technologies. “It’s a message that’s resonated and we are honored to have the opportunity to support some of the nation’s largest and most advanced departments.”

CNC Technologies’ customer-centric approach and relationships with all major equipment vendors allows the company to develop customized solutions that best match each client’s specific mission profiles. This includes expertise in developing long range, HD video and data transmission networks; experience building encrypted mobile communications tools to share real-time surveillance and data streams; and a strong background in creating hardened systems capable of fulltime operation in harsh environments. CNC backs all assignments with 24/7 live support, operator training and the ability to service all major aviation technology and transmission systems including camera platforms, communications components and software.

“There continues to be phenomenal worldwide demand for effective aviation technology

solutions that help law enforcement and government agencies meet critical public safety and homeland security needs,” said Alex Giuffrida, founding partner at CNC. “We are looking forward to a strong 2018 with growth from both new and existing partners.”

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world’s most demanding operators. CNC works with clients around the globe, delivering customized mission suite solutions tailored to match each organization’s specific mission requirements and backed by unparalleled 24/7 service and support.
