## ***NEWS RELEASE***

### **FRASCA Expands Manufacturing Capacity with Level D FFS Contract Win**

March 1, 2021 Urbana, IL. FRASCA International, Inc (FRASCA) will be expanding their manufacturing facility in response to strong flight simulator sales including a contract for a Level D Full Flight Simulator (FFS) for an undisclosed helicopter operator. FRASCA currently operates out of an 85,000 square foot office and manufacturing facility which includes two additional outbuildings at their manufacturing facility in Urbana, Illinois.

The addition will increase the facility's size to accommodate manufacturing capacity for two Level D helicopter flight simulators with large dome visual systems and Roll On Roll Off cockpit configurations. These Level D simulators are the most advanced level of flight simulator and must meet strict qualification and training requirements. The addition will expand the factory's number of FFS pads to five while also increasing FRASCA's capacity for manufacturing larger aircraft as demand for these devices increases.

"Adding this manufacturing space is one visible element to our strategic plan to increase our engineering and manufacturing throughput," stated John Frasca, President of FRASCA International, Inc. "Other investments include 3D printing, network infrastructure upgrades and staffing additions."

Construction for the building addition will begin this Spring and will be completed in September of 2021. Despite the building expansion, FRASCA has been able to maintain their entire workforce throughout the COVID-19 pandemic and will continue hiring additional personnel as needed.

#### **About FRASCA International:**

FRASCA International designs and manufactures simulation technology and components that increase training efficiency. Founded in 1958 and based in Illinois, the company leads the industry in simulation technology and consistently delivers exceptional quality products and services based on a customer's unique requirements. Frasca

range of high-fidelity, competitively priced simulation equipment designed to prepare every pilot for re mission scenarios. Over 3000 Frasca simulators have been delivered worldwide. FRASCA is ISO: 9001:20
