Becker Announces First Secure Wireless Intercom System Customer

March 1, 2016 - Miramar, FL

Becker Avionics is proud to announce the sale of the first secure wireless intercom system (ICS) to Exploration Services LLC, a US customer. The PNG system by Axnes is capable of providing secure wireless intercom access to crew members. The elimination of the ICS chord allows crew members to move about the cabin without entangling passengers or cargo. The crew can seamlessly exit the aircraft to perform functions on the ground whether it is maintenance inspections of the aircraft or search and rescue efforts up to five nautical miles away from the aircraft.

The Axnes PNG system is waterproof and lends itself to operations such as search and rescue customers and those deploying rescue swimmers. The display on the system is NVG compatible which is perfect for customers using NVGs to enhance the safety of their nighttime operations.

The system has the capability through GPS position reporting of allowing the airborne crew to maintain continuous electronic surveillance of the location of any crew member operating outside of the aircraft. The system will display the location of a crew member performing duties outside the aircraft on the aircraft's moving map display. This feature allows the aircraft to deploy a rescue swimmer or other crew member in any environment and then return directly to the crew member to affect the rescue or pick up crew or cargo.

Becker Avionics will showcase their innovative products during the Helicopter Association International show held at the Kentucky Exposition Center in Louisville, Kentucky, March 1-3. Becker invites all attendees to visit exhibit #1611 during the event and view the latest in wireless ICS, Digital ICS and ADS-B technology.

About Becker Avionics

For nearly 60 years, Becker Avionics has developed, manufactured and distributed high-tech communication, navigation, surveillance and search and rescue equipment for airborne and ground applications. Becker is a leader in digital avionics technology, setting the standard in customer-centric, state-of-the-art airborne and ground-based solutions.

Becker has proudly provided world class products for general aviation, ATC, law enforcement, military and OEM organizations including Airbus, Airbus Helicopters, Bell Helicopter, BAE Systems (British Aerospace), ATR, CASA, RUAG, Xi'an Aircraft Corporation, AgustaWestland, Pilatus Aircraft, German Air Force, Navy and Army, German Border Patrol, German Police, Austrian Army and Police, Swiss Air Force, Dutch Police, Security Civil, Irish Air Corps, Egyptian Navy, Indonesian Navy, Portuguese Air Force, U.S. Army, U.S. Air Force, U.S. Navy and U.S. Auxiliary Civil Air Patrol.
