

PHI MRO Services Awarded Two (2) Bell 407 Completions by Louisiana State Police

LAFAYETTE, La. (August 1, 2024) – PHI MRO Services, a global leader in helicopter maintenance, repair and overhaul (MRO) services, announced today at the 2024 Airborne Public Safety Association Conference (APSCON) that it has been awarded a completion contract for two Bell 407 GXis by the Louisiana State Police’s Air Support Unit.

The Bell 407 GXi helicopters—known for their advanced avionics, powerful performance and versatile applications—will undergo comprehensive completion services at PHI’s state-of-the-art MRO facility in Lafayette, La. These services will include the installation of mission-specific equipment, avionics integration and custom interior modifications tailored to the operational needs of the Louisiana State Police. This significant contract underscores PHI MRO Services’ reputation for excellence and its role in enhancing public safety aviation capabilities by serving the law enforcement and government markets.

Scott McCarty, CEO of PHI Group stated, “PHI is honored to be chosen by the Louisiana State Police to provide comprehensive completion support for their new Bell 407 GXis. For 75 years, our team has maintained, completed and integrated technologies for customers around the

world, and we look forward to providing this critical aviation support to our home state of Louisiana.”

PHI MRO Services has a long-standing history of delivering MRO services to a diverse range of clients, including law enforcement and government agencies, emergency medical service providers and commercial operators. With a dedicated team of over 100 skilled professionals and a 200,000-square-foot facility equipped with the latest technological advancements, PHI ensures the highest standards of safety and quality in all its operations.
