

FLOYD RONEY AT THOMMEN FACTORY IN SWITZERLAND

MUTTENZ, SWITZERLAND – May 2019. After recently appointing Floyd Roney to manage sales and business development in North America, Thommen was very happy to have Floyd Roney for over a week at its main office in Switzerland for a dense agenda composed of technical briefings, product trainings and sales workshops to ensure best and continuous support to customers located in the US and Canada.

“Floyd’s visit to Switzerland was a great opportunity for him to make a deep-dive into the Thommen product portfolio and technologies. Besides their unsurpassed durability, our products are renowned for their extreme configurability, making them very customizable to accommodate a variety of different use cases”, said Thomas Terschlussen, Director of Sales and Marketing. “So there is nothing better for a salesperson than exchanging with the engineers and the workers that actually design and build the product. By doing that, you make sure that you provide the adequate support to efficiently guide the customer along the product selection process.”

“It is also a perfect time to understand more about Thommen’s rich and long history and their Swiss-made high-quality equipment. I had a great insight into Thommen’s values and their strong corporate culture. I now look forward to helping our customers with their current and upcoming requirements”, said F. Roney.
