title: S.A.F.E. Provides General Dynamics F-16 Fighting Falcon Maintenance Stands to Holloman AFB

S.A.F.E. Structure Designs is pleased to announce the order for custom maintenance stand sets for the F16 aircraft for the United States Air Force at Holloman AFB. The SAFETY FIRST ergonomic stands allow technicians SAFE access to all areas of the aircraft at the same time. This modular set of stands provides custom access to all panels and equipment without having to move the stands. The stands are equipped with the latest features including anti-fatigue mat and tool trays to increase comfort and efficiency. The stands are light weight and easy to move around. These stands provide a large work platform for added safety and will be used for both overhaul and routine maintenance.

“The USAF needed maintenance stands that could access all areas of the aircraft and all panels without blocking access to any part.” said Johnny Buscema, S.A.F.E. CEO. “This lean mean design is the only design to meet those standards. We are proud to provide custom support to the F-16 team at Holloman AFB. We have provided similar custom support equipment for a wide range of helicopters and airplanes in both the civilian and military sector.” S.A.F.E. Structure is expected to deliver the custom stands in mid March 2021.

S.A.F.E. will be providing a series of maintenance safety and training tips in video format for both helicopter and fixed wing mechanics. Please check the website for regular updates.

S.A.F.E. Structure Designs is the global leader in maintenance support equipment that strives to put safety first. S.A.F.E. listens to the needs of the maintenance teams and designs custom equipment to the exact specifications that consider realistic ergonomic factors as well as efficiency. S.A.F.E provides the answers to the unique challenges of working on complex aircraft
