

# ALEA 2017 Southeast Region Safety Seminar ... Get Your FAA Wings Credit

## ALEA is pleased to offer the following classes eligible for FAA Wings credit at our safety seminar in St. Augustine!

### "Practical Safety Management System Applications - Loss of Control"

**Topic:** Attacking Loss of Control using Safety Management Systems for general aviation.

**Date/Time:** On Wednesday, February 8, 2017 at 09:00 Eastern Standard Time

**Select Number:** SO1573541

**Credit:** 1 Credit for Basic Knowledge Topic 3

#### **Description:**

Safety Management Systems are the modern glass panel version of safety programs. When done correctly, SMS can help manage some of our most complicated risks in aviation. Just like modern glass panels, SMS is difficult to utilize properly without a little training. Much of the information available in the industry is designed for large fleet commercial operations. This class will illustrate how SMS can be used in general aviation to tackle such difficult topics as Loss of Control.

---

### "Surviving an IIMC Incident"

**Topic:** Factors and solutions for IIMC, including a real life scenario told by the pilot and ATC controller involved.

**Date/Time:** On Wednesday, February 8, 2017 at 15:00 Eastern Standard Time

**Select Number:** SO1573547

**Credit:** 1 Credit for Basic Knowledge Topic 3

#### **Description:**

Inadvertent Flight into Instrument Meteorological Conditions (IIMC) continues to be one of the leading lethal threats to helicopter operators. Despite advances in aircraft and avionics, we continue to suffer IIMC related fatalities year after year. This class will look at the unique aspects of IIMC and why it continues to claim so many lives. SMS based IIMC survival methods including training, CRM, policy suggestions and survival techniques will be discussed.
