CNC Technologies To Deliver Mission Suite Upgrade To Colorado State Patrol

Dallas, TX (March 12, 2025) – CNC Technologies, a leading provider of aviation technology and wireless communications solutions for law enforcement, military, and government agencies, announced today that it has been selected by the Colorado State Patrol (CSP) to provide an Intelligence, Surveillance, and Reconnaissance (ISR) upgrade for the agency's Pilatus PC-12 aircraft.

This contract builds upon CNC Technologies' ongoing collaboration with CSP, following the successful completion of a previous Pilatus PC-12 mission enhancement. That project included the integration of an L3 Wescam MX-15 EO/IR camera, managed by CNC Technologies.

The upcoming aircraft upgrade will be completed at Century Helicopters in Fort Collins, Colorado. CNC Technologies selected Century Helicopters as the partner completion facility for this project, recognizing the value of working with a Colorado-based company to ensure seamless execution.

"We are thrilled to partner with the Colorado State Patrol and support their critical public safety mission," said Shannon Mack Vice President, Law Enforcement Sales, at CNC Technologies. "Equipping their team with advanced aircraft technology underscores our commitment to providing cutting-edge solutions for law enforcement agencies nationwide. We look forward to a strong and collaborative relationship with the Colorado State Patrol."

The project is scheduled for completion in June 2025, with final delivery to the Colorado State Patrol later that month.

About CNC Technologies

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators.
