### **CNC Technologies To Deliver Three Cessna Caravans to California Highway Patrol**

**Los Angeles (March 12, 2025)** – CNC Technologies, an aviation technology and wireless communications company serving the law enforcement, military and government markets, announced today a contract to deliver three fully missionized Cessna Caravan 208 aircraft to the California Highway Patrol (CHP). Under the agreement, CNC Technologies will procure the aircraft, design the comprehensive mission suite package, and manage the complete integration process.

The aircraft will be equipped with advanced surveillance and mapping technology, including the Wescam MX15 and Shotover Mapping Systems. This sophisticated mission equipment will enhance CHP's aerial law enforcement capabilities across California. Additionally, CNC will provide its market-leading 24/7/365 service, support and training program.

This procurement brings the total to four Cessna Caravans purchased by CHP from CNC Technologies, further expanding the agency's aerial surveillance coverage and operational capabilities throughout California. The first aircraft was delivered last year, with these three new aircraft continuing the partnership.

"We are honored to continue our strategic partnership with the California Highway Patrol," said Alex Giuffrida, founding partner at CNC Technologies, "This latest acquisition further establishes CHP as one of the most technologically advanced aerial law enforcement agencies worldwide."

The addition of these four aircraft to CHP's fleet reinforces CNC Technologies' commitment to providing cutting-edge aviation solutions that enhance public safety and operational efficiency. By equipping agencies with state-of-the-art technology and comprehensive support, CNC Technologies continues to advance the capabilities of law enforcement aviation nationwide.

#### **About CNC Technologies**

CNC Technologies is an aviation technology and wireless communications company serving the law enforcement, government and military markets. Providing custom aerial surveillance, data transmission and counterterrorism solutions, the CNC team brings decades of experience deploying local, national and global communications networks for the world's most demanding operators. CNC works with clients around the globe, delivering customized mission suite solutions tailored to match each organization's specific mission requirements and backed by unparalleled 24/7 service and support.
