FOR IMMEDIATE RELEASE

FARGO JET CENTER COMPLETES DELIVERY OF DEDICATED AIR MEDICAL LEARJET 45 TO AIRMEDIC

March 5, 2026 (Fargo, ND) | Fargo Jet Center proudly announces the completion and delivery of a newly outfitted dedicated air medical Learjet 45 to Airmedic, a Canadian air ambulance provider specializing in short- and long-distance patient repatriation and critical care transport.

A delegation from Airmedic traveled to Fargo in late January to perform final inspections and formally accept the aircraft.

“It is a privilege to be part of Airmedic’s commitment to advancing air medical transport,” said Mike Clancy, VP of Technical Services at Fargo Jet Center. “When lives depend on performance and reliability, every detail counts. We’re proud to deliver an aircraft designed to be mission-ready from the start.”

“Partnering with Fargo Jet Center allowed us to transform real-world operational needs, from patients and medical crews to client expectations, into a truly one-of-a-kind aircraft. With their expertise we were able to create a highly specialized and unique environment that enhances patient care, empowers our medical teams, and instills absolute trust in our clients when it matters most,” said Louis-Philippe Loiselle Fortier, Vice-President Strategic Initiatives and Business Development at Airmedic.

[Fargo Jet Center managed the full interior completion of the aircraft](#), with medical equipment integrations including:

- New Skytrac ISAT-200A Satcom/Flight Following system with cockpit audio interface and cabin handsets
- New composite sidewall with stainless steel overlay for sanitation and durability
- Integrated upper medical sidewall with oxygen, air, vacuum, and power outlets
- Custom Spectrum Aeromed medical cabinet
- Cabin lighting upgrades
- Spectrum Aeromed FWD baggage storage area
- Dedicated medical cabin power system and high-power USB charging ports
- Spectrum Aeromed overhead Brownline tracks for flexible equipment mounting and positioning
- Custom fit Loncoin flooring and privacy curtain
- Electric patient loader outlet

Airmedic will use the aircraft to support the transport of patients with complex medical needs across North America and on international repatriation missions. Designed to enhance in-flight intervention, these advancements will support medical crews in delivering complex care, promoting greater patient stability throughout transport, and ensure a safe and comfortable journey as patients are brought home.

About Airmedic

Airmedic is a Canadian air medical transport provider specializing in patient repatriation for both Canadian and international patients, serving Quebec and destinations worldwide. Its dedicated medical fleet consists of six Pilatus PC-12 NG aircraft and two Bombardier Learjet 45XR jets. Available 24/7, Airmedic delivers end-to-end mission management. Airmedic holds EURAMI accreditation for its fixed-wing operations, an internationally

recognized benchmark reflecting the highest standards in safety, quality, and best practices.

About Fargo Jet Center

Headquartered in Fargo, ND (KFAR), Fargo Jet Center (FJC) is a global leader in aviation services and special mission aircraft modifications. Since 1995, FJC has completed nearly 150 special mission aircraft used worldwide for air medical transport, atmospheric research, reconnaissance, and cloud seeding. FJC has extensive modification experience across platforms, including the Beechcraft King Air series, Cessna Citations, Bombardier Learjets, Pilatus PC-12, Daher Kodiak, and others. The company also holds multiple FAA STCs (validated in Europe [EASA] and China [VSTC]) for special missions integrations.

In addition to special missions, FJC provides a full range of aviation services including FBO operations, maintenance, avionics, aircraft charter and management, flight training, and interior completions. Its Minneapolis-based subsidiary, Premier Jet Center (KFCM), complements these services and is home to Exclusive Aircraft Sales, an IADA-accredited dealer. Fargo Jet Center and Premier Jet Center are members of NATA, NBAA, the Avfuel-branded FBO network, Pinnacle Air Network, and the Paragon Aviation Group. Learn more at www.fargojet.com.
