Tech-Tool Plastics Marks 50 Years of Innovation with New Product

*New Forward Reduced Cabin Comfort Windows
For AS350/355/H125 Sliding Door Configuration*

FORT LAUDERDALE, Florida (July 16, 2026) — Tech-Tool Plastics, Inc. (**APSCON Booth #824**), a trusted manufacturer of rotorcraft windows, is celebrating its 50th anniversary with the release of the Forward Reduced Door Cabin Comfort window at APSCON 2026.

“Fifty years is a milestone we’re incredibly proud of, but what makes it meaningful is the work we’ve been able to do for our customers over those decades,” said Tech-Tool Plastics President John Tracy Wilson. “This product is a perfect reflection of how we continue to approach innovation through increasing safety, comfort, and productivity for our customers with products that address the real-world challenges they face every day.”

Forward Reduced Cabin Comfort Window

Tech-Tool’s Forward Door Reduced Cabin Comfort Window rounds out the company’s industry-preferred Cabin Comfort window series for Airbus AS350/355/H125. Exclusive to Tech-Tool Plastics, these clear-view wedge-style windows add shoulder and elbow room. The addition of enhanced space in the cabin provides greater ease of maneuverability and improved comfort for both crew and passengers.

For years, Tech-Tool has offered forward and aft Cabin Comfort windows for the standard AS350/355/H125 door window configuration. The release of this new forward door window will complete their customized Cabin Comfort window options for the forward and aft windows on the sliding door configuration.

About Tech-Tool Plastics

For 50 years, Tech-Tool Plastics has designed and manufactured high-quality rotorcraft windows for the aviation and aerospace industry. With a commitment to quality, innovation, and customer service, Tech-Tool serves law enforcement and EMS agencies, operators and MROs worldwide.
